## Available for Models

PT-30  
PT-50  
PT-60  
PT-70  
PT-80  
PT-100G  
PT-100G Forestry

## Features

- Heavy-duty brush cutters for Terex® compact track loaders are industrial, deck-type mowers that quickly and efficiently clear a wide range of vegetation. They are ideal for land management, right-of-way and utility line clearing or maintenance, and property developments.
- Four models are available and are designed to match the loader width and hydraulic capacity.
- These cutters use heavy-duty components and centrifugal force to quickly clear vegetation including standing trees. Cutting blades are reversible and replaceable for fast maintenance. They are a very economical and effective land clearing and maintenance solution.
- Attaches quickly to the loader's quick attach interface. Uses machine's standard auxiliary hydraulics. All hydraulic hoses and connectors are included.
