

HYDROSEEDING SUPPLIES

(1 acre = 43,560 sq. ft.)

1-500 gallon tank covers 6,600 sq. ft.

It takes 6.6 tanks @ 500 gallon/tank to cover 1 acre

(Note: If filling hydroseeder with more than 500 gallons, materials must be recalculated. We suggest only filling our hydroseeders with 500 gallons of water per tank.)

Per 500 gallon tank (covers 6,600 sq. ft.), use the following:

- 500 gallons water
- 4-5 bags of pourable hydrojetmulch (sold by the 50# bag)
OR
- 4 ½ bales of compressed fiber mulch (sold by the 50# bale)
- 40#-50# grass seed (sold in 50# bags)
- 1 gallon 8-32-5 liquid starter fertilizer (sold in 2 ½ gallon containers)
- ¾ gallon liquid lime (sold in 2 ½ gallon containers)

COST SCENARIOS

	Cost per tank (6,600 sq ft)	Cost per acre (43,560 sq ft)
CONTRACTORS BLEND		
“Light coverage” (4 bags) of pourable mulch, contractors blend seed, liquid starter fertilizer & liquid lime	\$ 181.82	\$1,200.01
“Normal coverage” (5 bags) of pourable mulch, contractors blend seed, liquid starter fertilizer & liquid lime	\$ 198.31	\$1,308.85
